

HME 46-V-K

Pilot's Headsets

The HME 46 is a boomset for use in aircraft cockpits. It is a lightweight headset equipped with a noise-compensated microphone. Peak-Level-Protection protects the hearing from volume spikes coming from the radio.

- Extremely light weight
- Superb wearing comfort due to patented two-piece automatic headband and soft ear pads
- Flip-away headphone allows single-sided listening
- Flexible microphone boom, can be worn on either left or right-hand side
- Noise-compensated condenser microphone ensures excellent speech transmission
- Single-sided cable, length 1.85 m, easy to exchange
- With volume control
- Volume peaks above 110 dB are eliminated
- ETSO/TSO approval C57a and C58a
- Delivery includes: Headset HME 46
Carrying bag for headset
Cable clip
Wind and pop screen
User manual
EASA Form 1

Specifications

Headphone	HME 46-V-K
Transducer principle	dynamic
Ear coupling	supra-aural, open
Frequency response	20 – 14,000 Hz
Nominal impedance	600 Ω
Characteristic SPL	93 dB SPL at 1 kHz, 1 mW 95 dB SPL at 1 kHz, 1 V
THD, total harmonic distortion	1 % at 110 dB SPL at 1 kHz, 1 V (300 – 3,000 Hz)
Contact pressure	aprox. 3 N
Weight (without cable)	150 g
Operating temperature	- 10 °C to + 55 °C
Storage temperature	- 55 °C to + 70 °C
Microphone	Type MKE 46
Transducer principle	pre-polarized condenser microphone, noise-compensated
Frequency response	350 – 6,000 Hz
Output voltage	400 mW at 114 dB SPL, 17 – 100 mV/Pa adjustable, 40 mV/Pa
Terminating impedance	150 Ω – 2,200 Ω
Operating voltage	8 – 16 VDC
General Data	
Connection cable	single-sided round cable, length 1.85 m
Connectors	Headphone: 1/4" stereo jack Microphone: PJ-068 \varnothing 5.25 mm
Packaging	
Packaging dimensions (W x H x D in mm)	185 x 93 x 204
Carton dimensions (W x H x D in mm)	560 x 380 x 420
Units per carton	24
Languages	German, English, French, Spanish, Italian, Dutch
